Forward-Looking Information

Toronto Hydro Corporation (the “Corporation”) includes forward-looking information in its Management’s Discussion and Analysis (“MD&A”) within the meaning of applicable securities laws in Canada (“forward-looking information”). The purpose of the forward-looking information is to provide management’s expectations regarding the Corporation’s future results of operations, performance, business prospects and opportunities and may not be appropriate for other purposes. All forward-looking information is given pursuant to the “safe harbour” provisions of applicable Canadian securities legislation. The words “anticipates”, “believes”, “budgets”, “could”, “estimates”, “expects”, “forecasts”, “intends”, “may”, “might”, “plans”, “projects”, “schedule”, “should”, “will”, “would” and similar expressions are often intended to identify forward-looking information, although not all forward-looking information contains these identifying words. The forward-looking information reflects management’s current beliefs and is based on information currently available to the Corporation’s management.

The forward-looking information in the MD&A includes, but is not limited to, statements regarding Toronto Hydro-Electric System Limited’s (“LDC”) distribution revenue, the outcome of outstanding rate applications and other proceedings before the Ontario Energy Board (“OEB”), the Corporation’s plans to borrow funds to repay maturing debentures and to finance the investment in LDC’s infrastructure, LDC’s Conservation and Demand Management (“CDM”) programs, the expected results of legal proceedings, market volatility on the Corporation’s consolidated results of operations, performance, business prospects and opportunities, the effect of changes in interest rates on future revenue requirements and the changes in accounting estimates. The statements that make up the forward-looking information are based on assumptions that include, but are not limited to, the future course of the economy and financial markets, the receipt of applicable regulatory approvals and requested rate orders, the receipt of favourable judgments, the level of interest rates and the Corporation’s ability to borrow.

The forward-looking information is subject to risks, uncertainties and other factors that could cause actual results to differ materially from historical results or results anticipated by the forward-looking information. The factors which could cause results or events to differ from current expectations include, but are not limited to, market liquidity and the quality of the underlying assets and financial instruments, the timing and extent of changes in

prevailing interest rates, inflation levels, legislative, judicial and regulatory developments that could affect revenues and the results of borrowing efforts.

All forward-looking information in the MD&A is qualified in its entirety by the above cautionary statements and, except as required by law, the Corporation undertakes no obligation to revise or update any forward-looking information as a result of new information, future events or otherwise after the date hereof.

Introduction

The following MD&A should be read in conjunction with:

- the unaudited interim consolidated financial statements and accompanying notes of the Corporation as at and for the three-month period and nine-month period ended September 30, 2012 (the “Interim Consolidated Financial Statements”);
- the audited consolidated financial statements and accompanying notes of the Corporation as at and for the year ended December 31, 2011 (the “Annual Consolidated Financial Statements”); and
- the Corporation’s MD&A for the year ended December 31, 2011 (including the sections entitled “Electricity Distribution – Industry Overview”, “Summary of Quarterly Results”, “Liquidity and Capital Resources”, “Corporate Developments”, “Legal Proceedings”, “Share Capital”, “Transactions with Related Parties”, “Risk Factors”, “Critical Accounting Estimates”, “Changes in Accounting Estimates”, and “Future Accounting Pronouncements” which remain substantially unchanged as at the date hereof except as noted below or as updated by the Interim Consolidated Financial Statements).

Copies of these documents are available on the Canadian Securities Administrators’ web site at www.sedar.com.

Effective January 1, 2012, the Corporation’s Interim Consolidated Financial Statements have been prepared in accordance with United States Generally Accepted Accounting Principles (“US GAAP”), including the accounting principles prescribed by the OEB in the “Accounting Procedures Handbook for Electricity Distributors” (the “AP Handbook”) and are presented in Canadian dollars (see “Significant Accounting Policies” below). The Corporation’s Annual and Interim Consolidated Financial Statements were prepared in accordance with Part V of Canadian Generally Accepted Accounting Principles (“Canadian GAAP”) until December 31, 2011. All comparative consolidated financial statements have been adjusted retroactively from the consolidated financial statements previously presented to conform to the presentation of the Corporation’s 2012 interim consolidated financial statements prepared in accordance with US GAAP.

Business of Toronto Hydro Corporation

The Corporation is a holding company which wholly-owns two subsidiaries:

- *LDC* - which distributes electricity and engages in CDM activities; and
- *Toronto Hydro Energy Services Inc.* (“TH Energy”) - which provides street lighting services.

The principal business of the Corporation and its subsidiaries is the distribution of electricity by LDC. LDC owns and operates an electricity distribution system, which delivers electricity to approximately 716,000 customers located in the City of Toronto (the “City”). LDC is the largest municipal electricity distribution company in Canada and distributes approximately 19% of the electricity consumed in Ontario. The business of LDC is regulated by the OEB which has broad powers relating to licensing, standards of conduct and service and the regulation of electricity distribution rates charged by LDC and other electricity distributors in Ontario. See note 3 to the Interim Consolidated Financial Statements.

The sole shareholder of the Corporation is the City.

Executive Summary

- Net income for the three months and nine months ended September 30, 2012 was \$34.4 million and \$63.1 million, compared to net income of \$29.0 million and \$78.7 million for the comparable periods in 2011;
- capital expenditures were \$67.3 million and \$182.6 million for the three months and nine months ended September 30, 2012, compared to \$101.6 million and \$306.8 million for the comparable periods in 2011, with the decrease primarily related to uncertainty regarding the electricity distribution rates of LDC for 2012;
- on May 10, 2012, LDC filed an application for electricity distribution rates for 2012, 2013 and 2014 using the Incentive Regulation Mechanism (“IRM”) framework, including the filing of an Incremental Capital Module (“ICM”) application (the “IRM/ICM Application”);
- on October 31, 2012, an update to the IRM/ICM Application was submitted by LDC modifying the requested amounts for 2012 and 2013, respectively, and requesting that consideration for 2014 be deferred until LDC has received a decision from the OEB in respect of the 2012 and 2013 rate years; and
- effective January 1, 2012, the Corporation’s Interim Consolidated Financial Statements have been prepared in accordance with US GAAP.

Results of Operations

Net Income

Net income for the three months and nine months ended September 30, 2012 was \$34.4 million and \$63.1 million compared to net income of \$29.0 million and \$78.7 million for the comparable periods in 2011.

The increase in net income for the three months ended September 30, 2012 was primarily due to lower depreciation expense (\$3.0 million), higher net revenues (\$2.0 million) and lower operating expenses (\$1.3 million). These favourable variances were partially offset by higher income tax expense (\$1.0 million).

The decrease in net income for the nine months ended September 30, 2012 was primarily due to restructuring costs incurred in conjunction with cost reduction initiatives at LDC recognized in the first quarter of 2012 (see “Results of Operations – Restructuring Costs” below) (\$27.8 million), a gain on disposals of PP&E recorded in the comparative period of 2011 (\$5.0 million) and higher income tax expense (\$1.4 million). These unfavourable variances were partially offset by lower operating expenses (\$15.3 million), higher net revenues (\$1.5 million) and lower depreciation expense (\$1.4 million).

Net Revenues

Net revenues for the three months and nine months ended September 30, 2012 were \$154.8 million and \$436.7 million compared to \$152.8 million and \$435.2 million for the comparable periods in 2011 (see “Non-GAAP Financial Measures” below).

The increase in net revenues for the three months ended September 30, 2012 was primarily due to higher regulated distribution revenue at LDC (\$3.4 million) partially offset by lower other income (\$1.4 million). The increase in distribution revenue was primarily due to higher demand for electricity from large customers. The decrease in other income was primarily due to lower regulated customer connection work performed in 2012.

The increase in net revenues for the nine months ended September 30, 2012 was primarily due to higher regulated distribution revenue at LDC (\$2.8 million) partially offset by lower other income (\$1.3 million). The increase in distribution revenue was primarily due to higher demand for electricity from large customers. These variances were partially offset by an adjustment recorded in 2012 for future taxes payable to customers. The decrease in other income was primarily due to lower regulated customer connection work performed in 2012.

Expenses

Operating expenses for the three months and nine months ended September 30, 2012 were \$62.2 million and \$180.0 million compared to \$63.6 million and \$195.4 million for the comparable periods in 2011.

The decrease in operating expenses for the three months ended September 30, 2012 was primarily due to lower compensation costs resulting mainly from a workforce restructuring program implemented in 2012 (\$5.0 million) (see “Restructuring Costs” below) partially offset by higher operation maintenance costs primarily related to lower capital program at LDC in the third quarter of 2012 (\$3.7 million).

The decrease in operating expenses for the nine months ended September 30, 2012 was primarily due to a favourable reassessment for payments in lieu of additional municipal and school taxes by the Ministry of Finance of Ontario (“Ministry of Finance”) recorded in the second quarter of 2012 following a change in regulation related to prior periods (\$8.7 million) (see “Corporate Developments – Payments in Lieu of Additional Municipal and School Taxes” below), lower compensation costs resulting mainly from a workforce restructuring program implemented in 2012 (\$4.2 million) (see “Restructuring Costs” below), a one-time charge recorded in 2011 related to the decision by the OEB to disallow the recovery of a portion of the costs incurred by the Corporation regarding the IFRS conversion project (\$3.0 million), and lower bad debt expenses from unexpected collections in 2012 (\$2.1 million). These variances were partially offset by higher operation maintenance costs primarily related to lower capital programs at LDC in 2012 (\$5.2 million).

Depreciation and amortization expense for the three months and nine months ended September 30, 2012 was \$35.1 million and \$105.7 million compared to \$38.2 million and \$107.0 million for the comparable periods in 2011.

The decrease in depreciation and amortization expense for the three months ended September 30, 2012 was primarily due to assets reaching the end of their useful lives in excess of new additions in 2012.

The decrease in depreciation and amortization expense for the nine months ended September 30, 2012 was primarily due to certain assets being fully depreciated (\$8.8 million) and changes in accounting estimates related to the useful lives of certain assets (\$1.7 million). This decrease was partially offset by the depreciation of assets capitalized during the last quarter of 2011 and the first three quarters of 2012 in relation to the renewal of the regulated electricity distribution infrastructure of LDC (\$9.7 million).

Net Financing Charges

Net financing charges for the three months and the nine months ended September 30, 2012 were \$18.5 million and \$55.3 million compared to \$18.9 million and \$55.8 million for the comparable periods in 2011.

The decrease in net financing charges for the three months and the nine months ended September 30, 2012 was primarily due to the rollover of maturing debentures at a lower interest rate in late 2011, partially offset by lower interest capitalized in relation to allowance of funds used during construction due to lower capital spending in 2012.

Gain on Disposals of PP&E

Gain on disposals of PP&E for the three months and nine months ended September 30, 2012 was \$nil compared to \$0.3 million and \$5.0 million for the comparable periods in 2011. The variance in gain on disposals of PP&E was primarily due to the recognition of gains realized in connection with the disposals of surplus properties at LDC in 2011.

Restructuring Costs

In the first quarter of 2012, the Corporation's Board of Directors approved a workforce restructuring program aimed at reducing operating expenditures for LDC. The program was approved following the decision by the OEB to deny the request of LDC to set its electricity distribution rates for 2012, 2013 and 2014 under the Cost of Service ("COS") framework. In preparing its revised application using the IRM framework, LDC concluded that significant cost reductions were necessary to manage its business within the confines of the expected allowed electricity distribution rates provided by the IRM framework. The main component of these operating cost reduction initiatives was a workforce restructuring program, which included the severance of management employees and a voluntary exit incentive program for targeted unionized positions. See "Corporate Developments – Distribution Rates for LDC" below.

Restructuring costs for the nine months ended September 30, 2012 were \$27.8 million compared to \$nil for the comparable period in 2011. This balance was comprised of ongoing termination charges of \$23.7 million and one-time termination incentive charges of \$4.1 million, of which \$14.9 million remains unpaid as at September 30, 2012.

Income Tax Expense

Income tax expense for the three months and nine months ended September 30, 2012 was \$4.5 million and \$4.7 million compared to an income tax expense of \$3.5 million and \$3.3 million for the comparable periods in 2011.

The increase in the income tax expense for the three months ended September 30, 2012 was primarily due to higher earnings before taxes.

The increase in the income tax expense for the nine months ended September 30, 2012 was primarily due to lower deductions for permanent and temporary differences between accounting and tax treatments (\$5.2 million), partially offset by lower earnings before taxes (\$3.8 million).

Quarterly Results of Operations

The table below presents unaudited quarterly consolidated financial information of the Corporation for the eight quarters including and immediately preceding September 30, 2012.

Quarterly Results of Operations (in thousands of Canadian dollars, unaudited)				
	September 30 2012	June 30 2012	March 31 2012	December 31 2011
	\$	\$	\$	\$
Revenues	751,270	709,700	699,660	694,284
Costs	693,809	649,831	666,040	653,374
Net income (loss).....	34,436	41,538	(12,826)	17,228
	September 30 2011	June 30 2011	March 31 2011	December 31 2010
	\$	\$	\$	\$
Revenues	738,352	686,646	704,188	659,043
Costs	687,279	648,685	660,466	623,573
Net income	28,982	24,270	25,452	10,048

The Corporation's quarterly results are impacted by changes in revenues resulting from variations in seasonal weather conditions, the fluctuations in electricity prices and the timing and recognition of regulatory decisions. The Corporation's revenues tend to be higher in the first and third quarters of a year as a result of higher energy consumption for winter heating in the first quarter and air conditioning/cooling in the third quarter.

Financial Position

The following table outlines the significant changes in the consolidated balance sheets between September 30, 2012 and December 31, 2011.

Interim Consolidated Balance Sheets Data As at September 30, 2012 compared to December 31, 2011 (in thousands of Canadian dollars, unaudited)		
Balance Sheet Account	Increase (Decrease) \$	Explanation of Significant Change
Assets		
Cash and cash equivalents	(16,933)	See "Liquidity and Capital Resources" below.

Interim Consolidated Balance Sheets Data
As at September 30, 2012 compared to December 31, 2011
(in thousands of Canadian dollars, unaudited)

Balance Sheet Account	Increase (Decrease) \$	Explanation of Significant Change
Investments.....	(34,002)	The decrease in investments is due to the sale and maturity of two floating rate notes in the amounts of \$25.0 million and \$9.0 million, the first was sold on February 15, 2012 and the second matured on February 17, 2012.
Accounts receivable, net of allowance for doubtful accounts.....	29,974	The increase in accounts receivable is primarily due to the timing of billing and collection activities (\$32.6 million), partially offset by lower receivable from the Ontario Power Authority (“OPA”) for CDM programs in 2011 (\$4.2 million).
Income tax receivable.....	(4,672)	The decrease in income tax receivable is primarily due to a partial refund of prior year instalment payments.
PP&E and intangible assets, net	76,446	The increase in PP&E and intangible assets is due to capital expenditures (\$182.6 million), partially offset by depreciation during the period (\$105.7 million).
Regulatory assets.....	(9,193)	The decrease in regulatory assets is primarily due to a decrease in the retail settlement balances regulated by the OEB and lower smart meter recoveries for the year.
Deferred income tax assets.....	(6,613)	The decrease in deferred income tax assets is due to a decrease in the net deductible temporary differences between tax and accounting values of PP&E.
Liabilities and Shareholder’s Equity		
Restructuring accrual.....	14,887	The restructuring accrual is due to the workforce restructuring program initiated by the Corporation in the first quarter of 2012 (see “Results of Operations – Restructuring Costs” above).
Deferred revenue	10,541	The increase in deferred revenue is due to advances from the OPA relating to CDM programs.
Regulatory liabilities	(12,997)	The decrease in regulatory liabilities is due to the net disposition of retail settlement balances to customers approved by the OEB and a reduction of deferred income tax assets payable to customers.
Post-retirement benefits	6,530	The increase in post-retirement benefits is due to additional accruals for the current service provided by active employees, partially offset by benefits paid during the period.

Interim Consolidated Balance Sheets Data
As at September 30, 2012 compared to December 31, 2011
(in thousands of Canadian dollars, unaudited)

Balance Sheet Account	Increase (Decrease) \$	Explanation of Significant Change
Customers' advance deposits	(5,941)	The decrease in customers' advance deposits is due to the reimbursement of customer deposits during the period.
Retained earnings	22,182	The increase in retained earnings is due to net income during the period (\$63.1 million), partially offset by dividends paid (\$41.0 million).

Liquidity and Capital Resources

Sources of Liquidity and Capital Resources

The Corporation's primary sources of liquidity and capital resources are cash provided by operating activities, bank financing, interest income and borrowings from debt capital markets. The Corporation's liquidity and capital resource requirements are mainly for capital expenditures to maintain and improve the electricity distribution system of LDC, to purchase power, to meet financing charges and for prudential requirements.

The Corporation does not believe that equity contributions from the City, its sole shareholder, will constitute a source of capital.

Interim Consolidated Statement of Cash Flows
(in thousands of Canadian dollars, unaudited)

	Three months		Nine months	
	Ended September 30		Ended September 30	
	2012	2011	2012	2011
	\$	\$	\$	\$
Cash and cash equivalents, beginning of period ...	120,831	119,738	154,256	330,151
Net cash provided by operating activities	91,301	152,110	175,686	235,529
Net cash used in investing activities	(61,265)	(117,522)	(145,712)	(379,592)
Net cash used in financing activities	(13,544)	(373)	(46,907)	(32,135)
Cash and cash equivalents, end of period	<u>137,323</u>	<u>153,953</u>	<u>137,323</u>	<u>153,953</u>

Net Cash Provided by Operating Activities

Net cash provided by operating activities for the three months and nine months ended September 30, 2012 was \$91.3 million and \$175.7 million compared to \$152.1 million and \$235.5 million for the comparable periods in 2011.

The decrease in net cash provided by operating activities for the three months ended September 30, 2012 was primarily due to a variance in the aggregate amount of accounts receivable and unbilled revenue due to the timing of billing and collection activities (\$48.3 million), a decrease in change in other non-current liabilities (\$12.2 million), a decrease in post-retirement benefits (\$8.9 million), the recognition of a restructuring accrual in 2012 (see "Results of Operations – Restructuring Costs" above) (\$4.4 million), a decrease in deferred revenue primarily relating to cash received in advance from the OPA for CDM programs in 2011 (\$3.4 million), a decrease in

depreciation expense (\$3.0 million), and a decrease in accounts payable and accrued liabilities primarily due to timing of payments to suppliers (\$2.5 million). These variances were partially offset by an increase in other current liabilities (\$11.9 million), an increase in net income (\$5.5 million), and a decrease in income tax receivables (\$4.4 million).

The decrease in net cash provided by operating activities for the nine months ended September 30, 2012 was primarily due to a decrease in post-retirement benefits (\$26.6 million), a variance in the aggregate amount of accounts receivable and unbilled revenue due to the timing of billing and collection activities (\$19.9 million), a decrease in accounts payable and accrued liabilities primarily due to timing of payments to suppliers (\$18.0 million), a decrease in net income (\$15.6 million), a decrease in change in other non-current liabilities (\$12.4 million), and a decrease in deferred revenue primarily relating to cash received in advance from the OPA for CDM programs in 2011 (\$6.1 million). These variances were partially offset by the recognition of a restructuring accrual in 2012 (see “Results of Operations – Restructuring Costs” above) (\$14.9 million), an increase in other current liabilities (\$11.9 million), a decrease in income tax receivable (\$7.2 million), and a decrease in gain on disposals of PP&E (\$5.0 million).

Net Cash Used in Investing Activities

Net cash used in investing activities for the three months and nine months ended September 30, 2012 was \$61.3 million and \$145.7 million compared to \$117.5 million and \$379.6 million for the comparable periods in 2011.

The decrease in net cash used in investing activities for the three months ended September 30, 2012 was primarily due to lower capital expenditures in 2012 (\$34.3 million) and a higher change in net regulatory assets and liabilities (\$21.8 million) primarily related to a higher variance in 2012 of retail settlement balances regulated by the OEB.

The decrease in net cash used in investing activities for the nine months ended September 30, 2012 was primarily due to lower capital expenditures in 2012 (\$124.2 million), a variance related to short-term investment activities of excess cash (\$68.0 million) and a higher change in net regulatory assets and liabilities (\$45.0 million) primarily related to a higher variance in 2012 of retail settlement balances regulated by the OEB. These variances were partially offset by the impact of the net proceeds received in 2011 on the disposition of surplus properties (\$3.3 million).

The following table summarizes the Corporation’s capital expenditures for the periods indicated.

Capital Expenditures (in thousands of Canadian dollars, unaudited)				
	Three months		Nine months	
	Ended September 30		Ended September 30	
	2012	2011	2012	2011
	\$	\$	\$	\$
LDC				
Distribution system	59,286	87,359	160,733	265,027
Technology assets	5,458	7,238	15,331	21,900
Other ⁽¹⁾	2,418	6,035	5,991	15,738
	67,162	100,632	182,055	302,665
Other ⁽²⁾	165	969	542	4,131
Total Capital Expenditures	67,327	101,601	182,597	306,796

Notes:

- ⁽¹⁾ Consists of leasehold improvements, vehicles, other work-related equipment, furniture and office equipment.
- ⁽²⁾ Includes unregulated capital expenditures related to TH Energy.

Under the current electricity distribution rates of LDC, the OEB-approved regulated capital expenditures amounted to approximately \$140.0 million for 2012. For 2011, the OEB approved \$378.8 million in regulated

capital expenditures for LDC. On May 10, 2012, LDC filed the IRM/ICM Application. While the IRM/ICM Application proposed by LDC has been under consideration by the OEB, capital spending in 2012 has been maintained at a reduced amount (see “Corporate Developments – Distribution Rates for LDC” below).

The decrease in regulated capital expenditures at LDC for the three months and nine months ended September 30, 2012 amounted to \$33.5 million and \$120.6 million, respectively. The decrease was primarily due to the uncertainty surrounding LDC’s capital work program as a result of the OEB’s decision to impose the IRM framework for 2012.

For the nine months ended September 30, 2012, the decrease in regulated capital expenditures was primarily related to distribution lines (\$73.9 million), customer connections (\$10.2 million), feeders (\$10.0 million), metering (\$9.8 million), switchgear (\$6.1 million), standardization assets (\$6.0 million) and technology assets (\$5.6 million).

The most significant areas for regulated capital expenditures incurred by LDC in the first nine months of 2012 were related to maintaining the reliability of the electricity distribution system, primarily by replacing aging assets (\$51.8 million), expenditures related to the standardization and improvement of the electricity distribution system (\$30.0 million), upgrades to stations (\$22.5 million) and expenditures related to customer connections (\$13.0 million).

Net Cash Used in Financing Activities

Net cash used in financing activities for the three months and nine months ended September 30, 2012 was \$13.5 million and \$46.9 million compared to \$0.4 million and \$32.1 million for the comparable periods in 2011.

The increase in net cash used in financing activities for the three months ended September 30, 2012 compared to the same period in 2011 was primarily due to a decrease in customer deposits in 2012 in compliance with OEB rules and regulations (\$13.2 million).

The increase in net cash used in financing activities for the nine months ended September 30, 2012 compared to the same period in 2011 was primarily due to a higher dividend paid with respect to net income for the year ended December 31, 2011, which was paid to the City on March 12, 2012 (\$14.9 million).

Summary of Contractual Obligations and Other Commitments

The following table presents a summary of the Corporation’s debentures, major contractual obligations and other commitments.

Summary of Contractual Obligations and Other Commitments					
As at September 30, 2012					
(in thousands of Canadian dollars, unaudited)					
	Total	2012⁽¹⁾	2013/2014	2015/2016	After 2016
	\$	\$	\$	\$	\$
Debentures – principal repayment...	1,470,057	-	470,057	-	1,000,000
Debentures – interest payments.....	593,042	37,261	105,960	91,600	358,221

Asset retirement obligations.....	5,762	116	1,419	475	3,752
Total contractual obligations and other commitments.....	2,130,344	39,449	612,445	109,645	1,368,805

Note:

⁽¹⁾ The amounts disclosed represent the balances due over the period October 1, 2012 to December 31, 2012.

Credit Facilities

The Corporation is a party to a revolving credit facility with a syndicate of Canadian chartered banks (“Revolving Credit Facility”). On October 10, 2012, the amount the Corporation may borrow under the Revolving Credit Facility was increased from \$400.0 million to \$600.0 million and the expiry date extended from May 3, 2013 to October 10, 2017. An amount up to \$210.0 million (formerly \$140.0 million) is available in the form of letters of credit.

Additionally, the Corporation is a party to:

- a demand facility with a Canadian chartered bank for \$75.0 million (increased from \$50.0 million on October 10, 2012) for the purpose of issuing letters of credit mainly to support LDC’s prudential requirements with the IESO (“Prudential Facility”); and
- a demand facility with a second Canadian chartered bank for \$20.0 million for the purpose of working capital management (“Working Capital Facility”).

As at September 30, 2012, no amounts had been drawn under either the Revolving Credit Facility or the Working Capital Facility. As at September 30, 2012, \$49.0 million had been drawn on the Prudential Facility.

Prudential Requirements and Third Party Credit Support

The City has authorized the Corporation to provide financial assistance to its subsidiaries, and LDC to provide financial assistance to other subsidiaries of the Corporation, in the form of letters of credit and guarantees, for the purpose of enabling them to carry on their businesses, up to an aggregate amount of \$500.0 million. As at September 30, 2012, no financial assistance was provided by the Corporation or LDC to subsidiaries of the Corporation.

Dividends

On March 2, 2012, the Board of Directors of the Corporation declared dividends in the amount of \$29.0 million. The dividends were comprised of \$23.0 million with respect to net income for the year ended December 31, 2011, which was paid to the City on March 12, 2012, and \$6.0 million with respect to the first quarter of 2012, which was paid to the City on March 30, 2012.

On May 17, 2012, the Board of Directors of the Corporation declared a dividend in the amount of \$6.0 million with respect to the second quarter of 2012, which was paid to the City on June 29, 2012.

On August 17, 2012, the Board of Directors of the Corporation declared a dividend in the amount of \$6.0 million with respect to the third quarter of 2012, which was paid to the City on September 28, 2012.

On November 15, 2012, the Board of Directors of the Corporation declared a dividend in the amount of \$7.0 million with respect to the fourth quarter of 2012. The dividend is payable on December 31, 2012.

Credit Ratings

The Corporation and the debentures issued under its medium-term note program were rated as follows:

Credit Ratings As at September 30, 2012		
	Rating	Outlook
DBRS Limited.....	A (high)	Stable
Standard & Poor’s	A	Stable

Corporate Developments

Appointment

On July 13, 2012, the City, as sole shareholder of the Corporation, appointed Vincent Brescia on the Board of Directors of the Corporation. This appointment was effective immediately for a term ending November 30, 2012, or until a successor is appointed.

Distribution Rates for LDC

Regulatory developments in Ontario's electricity industry, including current and possible future consultations between the OEB and interested stakeholders, may affect LDC's electricity distribution rates and other permitted recoveries in the future.

LDC's electricity distribution rates for 2011 were determined through an application under the COS framework. The COS framework sets electricity distribution rates using a detailed examination of evidence and an assessment of the costs incurred by an electricity distributor to provide services to its customers.

On July 7, 2011, the OEB issued its decision regarding LDC's electricity distribution rates for 2011. The decision provided for a distribution revenue requirement and rate base of \$522.0 million and \$2,298.2 million, respectively. In addition, the decision provided for capital program spending levels and operating, maintenance and administration spending levels of \$378.8 million and \$238.0 million, respectively.

On August 26, 2011, LDC filed a rate application, following the COS framework, with the OEB seeking approval of separate and successive revenue requirements and corresponding electricity distribution rates for 2012, 2013 and 2014. The requested distribution revenue requirements for these years were \$571.4 million, \$639.5 million, and \$712.8 million, respectively, and the expected rate bases for these years were \$2,636.3 million, \$3,053.5 million, and \$3,503.2 million, respectively.

Pursuant to the IRM framework, the OEB established, as a preliminary issue in the above application, that it would consider the question of whether the application filed by LDC under the COS framework was acceptable or whether it should be dismissed. The IRM framework provides for an adjustment to an electricity distributor's rates based on a formulaic calculation with the possibility to request an ICM to address specific capital expenditure needs not covered by the formulaic calculation. The review of an ICM application is done by the OEB following defined criteria, such as materiality, causation and prudence.

LDC filed evidence supporting its position for electricity distribution rates to be set under the COS framework for 2012, 2013 and 2014. The OEB established a process by which a portion of LDC's evidence was tested during an oral hearing held in November 2011.

On January 5, 2012, the OEB rendered its decision on the preliminary issue and dismissed LDC's COS framework application for 2012, 2013 and 2014. In its decision, the OEB found that LDC was not permitted to deviate from the standard IRM framework cycle. Accordingly, LDC was required to file its request for electricity distribution rates for 2012, 2013, and 2014 pursuant to the IRM framework and to use the ICM to request the capital needed for infrastructure renewal.

On January 25, 2012, LDC filed a motion with the OEB to review the OEB's January 5, 2012 decision (the "Motion").

On February 6, 2012, LDC filed a notice of appeal with the Ontario Divisional Court regarding the OEB's January 5, 2012 decision (the "Appeal").

On May 10, 2012, LDC filed the IRM/ICM Application. The formulaic adjustment, requested by LDC, follows the guidelines provided by the OEB and seeks to increase the current revenue requirement by 0.68% to \$525.5 million for 2012, \$529.1 million for 2013 and \$532.7 million for 2014. The 2013 and 2014 formulaic adjustment may be subject to change depending on future inflation and market data.

The IRM/ICM Application proposed by LDC establishes rate riders allowing for the recovery of capital expenditures. Accordingly, the amount of capital expenditures included in LDC's proposed IRM/ICM Application amounts to \$448.7 million for 2012, \$534.5 million for 2013 and \$439.5 million for 2014.

On August 16, 2012, the OEB issued its decision on the issues list for the application filed May 10, 2012. In that decision, the OEB stated that further procedural steps would be determined pending LDC's response to the OEB as to whether LDC would continue to pursue the Motion and the Appeal. On August 20, 2012, LDC filed a notice of abandonment with the Ontario Divisional Court thereby terminating the Appeal. On the same date, LDC advised the OEB that it would withdraw its Motion for review.

While the IRM/ICM Application proposed by LDC has been under consideration by the OEB, capital spending in 2012 has been maintained at a reduced amount. As it is no longer practical to achieve the previously requested capital spend of \$448.7 million in 2012, an update to the IRM/ICM Application was submitted by LDC on October 31, 2012 modifying the requested capital expenditures for 2012 and 2013 to \$274.7 million and \$579.1 million, respectively, and requesting that consideration for 2014 be deferred to a second phase of the proceeding, once LDC has received a decision from the OEB in respect of the 2012 and 2013 rate years.

The current application is expected to be subject to an in-depth review by the OEB over the next few months. There can be no assurance that the OEB will allow for the total or partial recovery of the capital expenditure balances requested in the current application. The outcome of the current application could have a material impact on the Corporation's consolidated financial statements in the future.

CDM Activities

On March 31, 2010, the Minister of Energy and Infrastructure of Ontario, under the guidance of sections 27.1 and 27.2 of the *Ontario Energy Board Act, 1998* (Ontario), directed the OEB to establish CDM targets to be met by electricity distributors. Accordingly, on November 12, 2010, the OEB amended LDC's distribution licence to require LDC, as a condition of its licence, to achieve 1,304 GWh of energy savings and 286 Megawatts of summer peak demand savings over the period beginning January 1, 2011 through December 31, 2014.

Effective January 1, 2011, LDC entered into an agreement with the OPA in the amount of approximately \$50.0 million to deliver CDM programs extending from January 1, 2011 to December 31, 2014 (the "Master CDM Program Agreement"). As at September 30, 2012, LDC received approximately \$35.4 million from the OPA for the delivery of CDM programs under the Master CDM Program Agreement. All programs to be delivered under the Master CDM Program Agreement are fully funded and paid in advance by the OPA. Upon expiration of the agreement, LDC is required to repay to the OPA any excess funding received for program administration less any cost efficiency incentives. These programs are expected to support the achievement of the mandatory CDM targets described above.

OEB PILs Proceeding

The OEB conducted a review of the Payments In Lieu of Corporate Taxes ("PILs") variances accumulated in regulatory variance accounts for the period from October 1, 2001 to April 30, 2006 for certain Municipal Electricity Utilities ("MEUs"). On June 24, 2011, the OEB issued its decision for these MEUs and provided guidelines for the calculation and further disposition of the balances accumulated in the PILs regulatory variance accounts. The OEB has issued interrogatories and decisions for other MEUs subsequent to its previous decision.

LDC has reviewed the balances of its PILs regulatory variance accounts and applied the guidelines provided by the OEB. As at September 30, 2012, LDC estimated its liability at approximately \$5.7 million. This balance has been recorded in the Corporation's Interim Consolidated Financial Statements. LDC has applied for disposition of the balance as part of its pending IRM/ICM Application filed on May 10, 2012. The amount to be approved by the OEB will be based on the OEB's interpretation and application of its guidelines and the final balance which is yet to be approved by the OEB could differ materially from LDC's estimation of its liability.

Payments in Lieu of Additional Municipal and School Taxes

The Ministry of Finance had issued assessments in respect of payments in lieu of additional municipal and school taxes under section 92 of the *Electricity Act, 1998* (Ontario) that were in excess of the amounts LDC believed were payable. The dispute arose as a result of inaccurate information incorporated into Ontario Regulation 224/00. The Corporation worked with the Ministry of Finance to resolve this issue, and as a result the Ministry of Finance issued Ontario Regulation 423/11 on August 31, 2011. The new regulation revoked Ontario Regulation 224/00 and corrected inaccurate information retroactively to 1999.

In May 2012, the Ministry of Finance completed its reassessment as a consequence of the change in regulation. The impact of the reassessment issued was favourable to the Corporation.

Legal Proceedings

In the ordinary course of business, the Corporation is subject to various litigation and claims with customers, suppliers, former employees and other parties. On an ongoing basis, the Corporation assesses the likelihood of any adverse judgments or outcomes as well as potential ranges of probable costs and losses. A determination of the provision required, if any, for these contingencies is made after an analysis of each individual issue. The provision may change in the future due to new developments in each matter or changes in approach, such as a change in settlement strategy.

Christian Helm Class Action

On December 6, 2010, a statement of claim in a proposed class action was issued against LDC. The claim sought general and special damages in the amount of \$100.0 million for disgorgement of unjust gains allegedly resulting from the receipt of interest on overdue accounts in contravention of the *Interest Act* (Canada). On April 30, 2012, a settlement reached by the parties was approved by Order of the Ontario Superior Court of Justice. Pursuant to the terms of the Order, LDC was required to pay the amount of \$5.8 million plus costs in settlement of all claims, substantially all of which had been paid as at September 30, 2012. The Corporation accrued a liability to cover the expected settlement in 2010. The action has been dismissed, and the claims by all class members have been released.

2 Secord Avenue

An action was commenced against LDC in September 2008 in the Ontario Superior Court of Justice under the *Class Proceedings Act, 1992* (Ontario) seeking damages in the amount of \$30.0 million as compensation for damages allegedly suffered as a result of a fire and explosion in an underground vault at 2 Secord Avenue on July 20, 2008. This action is at a preliminary stage. The statement of claim has been served on LDC, a statement of defence and third party claim have been served by LDC and a third party defence and counterclaim against LDC seeking damages in the amount of \$51.0 million have been filed. A certification order has been issued. Affidavits of documents have been produced by LDC to the other parties and examinations for discovery have commenced and are continuing. Given the preliminary status of this action, it is not possible to reasonably quantify the effect, if any, of this action on the financial performance of the Corporation. If damages were awarded, LDC would make a claim under its liability insurance which the Corporation believes would cover any damages which may become payable by LDC in connection with the action.

On December 20, 2010, LDC was served with a statement of claim by the City seeking damages in the amount of \$2.0 million as a result of the fire at 2 Secord Avenue. A statement of defence and a third party claim have been served. Given the preliminary status of this action, it is not possible to reasonably quantify the effect, if any, of this action on the financial performance of the Corporation. If damages were awarded, LDC would make a claim under its liability insurance which the Corporation believes would cover any damages which may become payable by LDC in connection with the action.

By order of the court dated January 24, 2012, the above actions and a smaller non-class action commenced in April 2009 involving the same incident will be tried at the same time or consecutively.

2369 Lakeshore Boulevard West

A third party action was commenced against LDC in October 2009 in the Ontario Superior Court of Justice under the *Class Proceedings Act, 1992* (Ontario) seeking damages in the amount of \$30.0 million as compensation for damages allegedly suffered as a result of a fire in the electrical room at 2369 Lakeshore Boulevard West on March 19, 2009. Subsequently, in March 2010, the plaintiff in the main action amended its statement of claim to add LDC as a defendant. The plaintiff in the main action seeks damages in the amount of \$10.0 million from LDC. Both actions are at a preliminary stage and the certification hearing has yet to occur. Statements of defence to the main action and to the third party claim have not been filed. Accordingly, given the preliminary status of these actions, it is not possible at this time to reasonably quantify the effect, if any, of these actions on the financial performance of the Corporation. If damages were awarded, LDC would make a claim under its liability insurance which the Corporation believes would cover any damages which may become payable by LDC in connection with these actions.

Another third party action was commenced against LDC in October 2009 in the Ontario Superior Court of Justice seeking damages in the amount of \$30.0 million as compensation for damages allegedly suffered as a result of the fire at 2369 Lakeshore Boulevard West. Subsequently, in March 2010, the plaintiff in the main action amended its statement of claim to add LDC as a defendant. The plaintiff in the main action seeks damages in the amount of \$0.4 million from LDC. LDC has filed a statement of defence, crossclaim and counterclaim. Examinations for discovery have not taken place, notwithstanding a court ordered timetable to have them completed by February 29, 2012. Accordingly, given the preliminary status of these actions, it is not possible at this time to reasonably quantify the effect, if any, of these actions on the financial performance of the Corporation. If damages were awarded, LDC would make a claim under its liability insurance which the Corporation believes would cover any damages which may become payable by LDC in connection with these actions.

On August 29, 2011, LDC was served with a statement of claim by the owner of the building and the property management company for the building seeking damages in the amount of \$2.0 million as a result of the fire at 2369 Lakeshore Boulevard West. LDC has filed a statement of defence and counterclaim. Given the preliminary status of this action, it is not possible to reasonably quantify the effect, if any, of this action on the financial performance of the Corporation. If damages were awarded, LDC would make a claim under its liability insurance which the Corporation believes would cover any damages which may become payable by LDC in connection with the action.

Share Capital

The authorized share capital of the Corporation consists of an unlimited number of common shares of which 1,000 common shares are issued and outstanding as at the date hereof.

Transactions with Related Parties

The City is the sole shareholder of the Corporation. Subsidiaries of the Corporation provide certain services to the City at commercial and regulated rates, including electricity, street lighting and other services. All transactions with the City are conducted at prevailing market prices and normal trade terms. Additional information with respect to related party transactions between the Corporation and its subsidiaries, as applicable, and the City is set out below.

Transactions with Related Parties Summary (in thousands of Canadian dollars, unaudited)				
	Three months		Nine months	
	Ended September 30		Ended September 30	
	2012	2011	2012	2011
	\$	\$	\$	\$
Revenues	58,274	53,091	168,957	156,159
Operating expenses and capital expenditures	4,420	6,177	16,462	15,513
Dividends	6,000	6,000	40,966	26,063

Transactions with Related Parties Summary
(in thousands of Canadian dollars, unaudited)

	As at September 30 2012 \$	As at December 31 2011 \$
Accounts receivable	5,650	8,412
Unbilled revenue	9,528	8,692
Other assets	8,965	7,279
Accounts payable and accrued liabilities.....	24,424	25,085
Advance deposits.....	8,850	8,714

Revenues represent amounts charged to the City primarily for electricity, street lighting services, and ancillary services. Operating expenses and capital expenditures represent amounts charged by the City for purchased road cut repairs, property taxes and other services. Dividends represent dividends paid to the City.

Accounts receivable represent receivables from the City primarily for electricity, street lighting and ancillary services. Unbilled revenue represents receivables from the City related to the provision of electricity and other services provided and not yet billed. Other assets represent amounts primarily for prepaid land leases from the City and prepaid property taxes to the City. Accounts payable and accrued liabilities represent amounts payable to the City relating to road cut repairs and other services, as well as funds received from the City for the construction of electricity distribution assets. Advance deposits represent funds received from the City for future expansion projects.

See note 20 to the Interim Consolidated Financial Statements.

Non-GAAP Financial Measures

The Corporation’s MD&A includes “net revenue” which is a non-GAAP financial measure. The definition of net revenues is revenue minus the cost of purchased power. This measure does not have any standard meaning prescribed by US GAAP and is not necessarily comparable to similarly titled measures of other companies. The Corporation uses this measure to assess its performance and to further make operating decisions.

Significant Accounting Policies

The Interim Consolidated Financial Statements of the Corporation have been prepared in accordance with US GAAP, including accounting principles prescribed by the OEB in the AP Handbook, and are presented in Canadian dollars. In preparing the Interim Consolidated Financial Statements, management makes estimates and assumptions which affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the Interim Consolidated Financial Statements and the reported amounts of revenues and expenses for the period. Actual results could differ from those estimates, including changes as a result of future decisions made by the OEB, the Ministry of Energy, or the Ministry of Finance. The significant accounting policies of the Corporation are summarized in note 4 to the Interim Consolidated Financial Statements.

Future Accounting Pronouncements

A number of new standards and interpretations are not yet effective for the period ended September 30, 2012. The Corporation continues to analyze these standards and has initially determined that the following could have a significant effect on the consolidated financial statements.

In December 2011, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) No. 2011-11, “Balance Sheet (Topic 210): *Disclosures about Offsetting Assets and Liabilities*” (“ASU 2011-11”). The amendments require an entity to disclose both gross and net information about financial instruments and transactions eligible for offset in the consolidated balance sheets. ASU 2011-11 is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013. Retrospective application is required.

The adoption of this amendment is expected to increase disclosures related to offsetting assets and liabilities and is not expected to have an impact to the Corporation's consolidated balance sheets.

US GAAP Transition

Publicly accountable enterprises in Canada were required to adopt IFRS for interim and annual reporting purposes for fiscal years beginning on or after January 1, 2011. On September 10, 2010, the Accounting Standards Board granted an optional one-year deferral for IFRS adoption for entities subject to rate regulation. The Corporation elected to take the optional one-year deferral of its adoption of IFRS. In the absence of a definitive plan to consider the issuance of a rate-regulated accounting standard by the International Accounting Standards Board, the Corporation decided to evaluate the option of adopting US GAAP effective January 1, 2012 as an alternative to IFRS. On August 26, 2011, the Board of Directors of the Corporation approved the adoption of US GAAP for financial reporting purposes for the year beginning on January 1, 2012.

The accounting policies set out in note 4 to the Interim Consolidated Financial Statements have been applied consistently in preparing the Interim Consolidated Financial Statements and the comparative periods. The Corporation's first US GAAP annual consolidated financial statements will be dated December 31, 2012.

The quantification and reconciliation of the Corporation's consolidated balance sheet as at December 31, 2011, prepared in accordance with US GAAP as compared to Canadian GAAP is an increase to both total assets and total liabilities of approximately \$71.7 million. The increase is primarily due to the recognition of unamortized actuarial losses and prior service costs and the reclassification of debt issuance costs in accordance with US GAAP. With respect to the consolidated statement of income and comprehensive income for the period ended December 31, 2011, net income was not impacted due to the Corporation's continued ability to apply rate-regulated accounting policies. Based on the detailed assessment of the key accounting areas for which significant Canadian GAAP and US GAAP differences were identified, there was no impact to equity and net earnings from those previously reported in the Interim and Annual Consolidated Financial Statements.

The Corporation has adjusted amounts reported previously in its Interim and Annual Consolidated Financial Statements prepared in accordance with Canadian GAAP. For reporting purposes, the transition date to US GAAP is January 1, 2011, which is the commencement of the 2011 interim comparative period to the Corporation's 2012 Interim Consolidated Financial Statements. A reconciliation of the transition from Canadian GAAP to US GAAP from January 1, 2011 and December 31, 2011 is provided in note 24 to the Interim Consolidated Financial Statements. Due to the limited differences between Canadian GAAP and US GAAP, the Corporation's debt covenants were not impacted by the conversion to US GAAP.

As a result of the transition to US GAAP, there was no significant impact on the Corporation's internal controls, information technology systems and financial reporting expertise requirements. The Corporation has completed topic-specific and relevant training to affected finance and operational teams on all key differences between Canadian GAAP and US GAAP, including management, the Board of Directors, and relevant committees thereof, including the audit committee. During the remainder of 2012, the Corporation will continue to focus on training for any key developments in US GAAP and the potential impacts to the Corporation's consolidated financial statements.

On February 28, 2012, LDC submitted a letter to the OEB requesting an accounting order establishing a deferral account to record the accounting differences between Canadian GAAP and US GAAP. On June 7, 2012, the OEB approved the establishment of the accounting policy changes account to record the expected electricity distribution charges to customers arising from timing differences in the recognition of actuarial gains and losses and prior service costs related to other post-retirement benefits. The OEB's approval of this account does not constitute a decision with respect to the Corporation's use of US GAAP for regulatory reporting purposes and LDC will seek this approval in its next electricity distribution rate rebasing application.

Selected Financial Highlights

The following table sets forth selected financial information of the Corporation for the three months and nine months ended September 30, 2012 and for the comparable periods in 2011. This information has been derived from the Interim Consolidated Financial Statements.

Selected Financial Highlights
(in thousands of Canadian dollars, unaudited)
